The first-day's bearing in the Montana technicalities, and the formal argument will begin to morrow. The republicant think they scored the first point in the struggle, but the advantage gained was immuterial.

The Nugle case has been advanced on the docket of the supreme court of the United States. The sooner it is decided the bester. The pendancie of a social and the bester. The pendency of a criminal proceeding to which a judge of the supreme court is a quasi party is a mild secondal, however incolumntary his connection.

The purser of the steamer Cyclone is under urrest on the charge of perjuty in his evidence in the damage suit growing out of the coldsion with the Alarm. This step seems to have been taken more with a view o getting at the truth of the matter than for the purpose of punishing the purser.

The county commissioners merit censure or the escape of five prisoners from the county jail Sunday night. The hole in the source yan sunday nigot. The note in the stone partition, through which five men made their escape in Aug 1st, had never been repaired, and the men who got away Sunday night had no troube in |diggling liker way out. It is a sad commentary upon the condition of the jail when men can dig through stone wall in half an hour.

The committee of the Oregon senate having charge of the special ascessment law will hold a meeting in Portland soon and try to make a beginning of its important work. The rapid growth of public sentiment throughout the state in favor of a revised and improved assessment law has a lot upon the committee. It is expected that a plan will be matured before the meeting of the next session of the legislature.

BIRMINGHAM, Ala, Oct. 28.—Nithing new has been learned from B enut-county to-tiny, except that Italia Burrows is shill at large. The governor, in reply to the sheriff's request for help, and twenty picked men. The report that enether officer has been billed is unconfirmed, and is most probably false. The impression is growing that it is not Rube Burrows that the sherid is following. These men go along the high road, storping at houses and inquiring their way. Italia has nevel to be this, but after help seen has always disappeared utterly until the next robbery.

For the Manders of a Tension.
Challances Time (bend)
The bounding of Senitor Manderson about the rerating of his pension, by a certain section of the press, we have always believed in just. It new turns out that the senitor made no ranger for a resulting sension made no request for a recuting:
that on receipt of his certificate as a recating
pensioner be sent the same to the secretary of
the interior to inquire if it were legal and on
an adverse decision of that point he
promptly rolumed the document for cancellation. The brulat fight on the sensior
by a squad of scribblers who incider experienced the dangers nor appreciate the
honors of war should now case.

The Times ranically differs from Manderson on most of the issue stant sivile parties;
but his record is that of, an honorable and
gollant solder in war and a useful and faithful citizen in peace. If he should get a little
more than he might be entisled to by law wa
could forgive him.

WHY \$AIT FOR MONTANAT

There is no good reason why Washington and the Dakotas should wait for admission into the Union until Montana is ready The law prescribing the conditions of ad mission does not provide that all the four territories shall be proclaimed ar admitted at once It provides that the governor secretary of state and chief justice of each torri-tory shall canvass the voves upon the con-stitution and certif, the result to the presi-dent, If the vote is affirmulare, and if the president is satisfied that the form of got ernment created by the constitution in each Union of states The sets prescribed to the canvassing boards and to the executive are distinctly separate though they may be per formed simultaneously. There is no im-portant reason why the admission should be simultaneous and 10 justice in keeping one territory which is ready for admission waiting for another which is not buppose the constitution has first the constitution had failed of adoption in a ther terriory. That would have been no reason for celaying action upon the claims of the others for statebood. The famore romatist to determine the result of the c.c.

The votes upon the constitution and state the votes upon the constitution, and state officers have been canvassed and certified to the president of North and South Dar officers and Washington territory. In all three the constitution has been adopted and they are clearly respiktion in form. The president's proclamation admitting these three term tories as states mucht be issued to morrow Dispatches from Washington unnounce that action in these cases is withdrid be cause the returns from Montana have not been feceived and it is desired to admir all the new states of the same time. It must entirely gratuatous to attribute to the sident being in the necessity of this do lay It must be clear to him and his law officers that every proclamation of admission is a repurse executive act. I sough they may be made together for convenience, they are none the less distinct. Not a parucle of difference could be made in their effect and legality if they were issued at auenert and regard it may were some at a tervals of a week or a month. If the presi-dent has aky reason for wishing to admit the four pew aintes tagether, it must be rely a reason of convenience or sentiment lt is all very well to be governed by these considerations, if the resulting delay is not too great. But if the Montani dispute is not promptly settled -and the hearing be fore the supreme court of the mandamus proceedings again t the election officers of Sulver Bow county may possibly prolong it nor weeks—the people of the other states waiting for admission will grow your mann earlier executive action in their The impression seems to prevail in some

quarters that the state legislatures can not be convened until the states are declared edmitted by the president. This is a mistake The act of admission expressly provides that the governor may summon the legisla-ture of eight territory in special session as soon as the result of the election is known. for the purpose of electing two persons to the office of United States senator Governor Mellette, of South Dakota, who happens to be territorial governor and governor elect of the new state at the same time, is the only one of the four executives who has availed himself of this authority. The legislature of South Dagota met and elected two senators more than a week ago, having been sum moned at the same time the result of the election was cortified to the prevident. This action is perfectly legal and intuit be init tated in any other of the new states, though it might be a little awkward in those where governor and territorial governor tre the same person. In that case the call ing of the state legislature together before the territorial juri-diction had ceased would the territorial particular in high series would lead to a little overlapping of the two juris dictions which it is just as well to avoid. In Washington, the constitutional convention did away with any such measuresty by Asing the time for the first meeting of the legisla ture in the constitution. In North Dakota and Montana the time seems to have been

A JUST PUNISHDENT

Our dispatches Sesterday critained a let ter from Secretary Noble to Colonel I I bmith who was removed by the secretary from the head of the certificats division of the pension bureau, because he accepted from the late Commissione Lanner an wholly illegat and unwarrunted rerating of his pension thus robbing the government of over \$6000. There were ten clerks in Lan ner's bureau who had their persons illegally rerated and they received a together in becking the state of the removed. The case of Smith fully justifies the strong language used by Secretary Noble in dismissing him from office. Smith was a captain of the Fourth New York Independent butter. In 18-6 he made application for a pension alleging disability rum rheuma tism contracted in May 1862 in the Chicka hommy swamps. In 1884 he was granted a pension at the rite of three-lou the disalt its from 1868 to January of 1884 and total disa billy from the latter date. In 1887 he was perated and given the rate for total dischilly figures bring us face to face with the fact a month from 1572 and \$33 fom 158. The "438 Whenever the schafors from a Whenever the senators from a He says Whenever the senators from a state raye uppeared and an idited the senate that I each instance adopted resolutions describ is minutely the method of procedure ni dr wing for clusses and the course has the list classification (1789) there has been no instance where senators from the list classification (1789) there has been no instance where senators from mon than one new state have appeared at the same thine, though there have keen instances, or at least one where a single act of congress has provided for the admission of more than one state. Should the senators from the four states appear to gether the case would be somewhat new Mr. Sencers as a the senate will undoubted by peters by the senate will undoubted by peters by resolution how the classification means at a eyent should be made but what source it will adopt he has no means of kinds in the senate a revent should be made but what source it will adopt he has no means of kinds in the states that the senate as now classified at most is follow. For me expiring March 4 1891 to 1891, to 1890, to 1890 to 1891 and 1893 and like southon of the inclosers would be easiered to the classes of 1801 and 1893 and like southon of the inclosers would be easier and the incloser would be easier and the inclosers would be easier and the incloser would be to procedure perfectly fair you do be to procedure perfectly fair you do be to procedure perfectly fair you do be to procedure bediets in a box mathered respectives it 2, 3 and 4. Let ope son, all being cutiled to equal chance, to celermine the order of drawing for his classification. The senator drawing for the wearners move existing in the classes of 1801 and 1803. The senator drawing the ballot be a fail the largest time electing the centors had indicated the terms long and short, there

tory would draw by lot, for the long and sometern in their respective classes. If the laggestature electing the senators had niderted the terms long and short there would be obtained by the total course the will of the legislature would be a matter of course when a legislature would be a matter of course when the two senators and possibly the resolutions of the senators and possibly the resolutions of the senator such preceding the method of procedure would recognize the action of the legislature of the state or states that had seen fit to bull cate their preference for the long terms or teams. We spence thanks there is

lather of the state or states that had seen fit to hid cate their proference for the long terms or terms. It spencer thinks there is nothing in the theory that the order in while it the states are damed in the enabling act will determine the classifications for the see afor. He does not see that there is any remon or common sense in the suggestion. He means to say that if they appear all at once they will be disposed of in the manner here; reched. He remarks. Possibly the dates of the pre-security produmation declaring the states admitted it is used separately migh have some effect. But he doesn't see hew that could be, either.
